

What is COACH ?

by [CareerVillage.org](https://www.careervillage.org)

1

Career Based AI Chatbot

Coach is specifically designed to respond to education and career development questions. Coach is the product of a collaboration with sector experts, ensuring the relevance of its content,

2

Single Location

In a world full of Chatbots and AI-based tools. Coach consolidates several career focused activities into one location; granting educators and organizations the ability to streamline the use of the resource.

3

Human + Technology

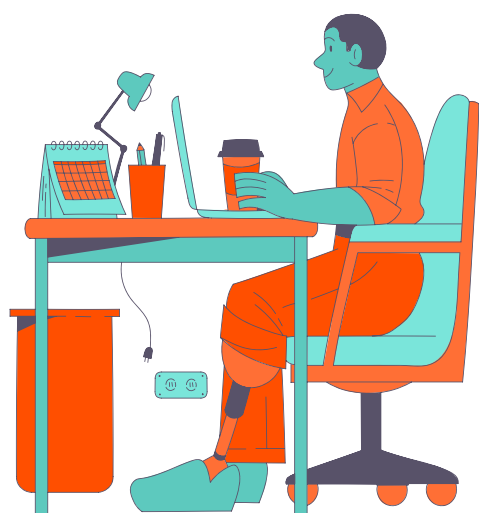

CareerVillage instituted human-in-the-loop monitoring for Coach. Human-in-the-loop simply incorporates human involvement in the monitoring process for the safety of its users.

4

Improved visibility

By consolidating several AI-based career exploration tools into one place, Coach also includes educator dashboards to support the work of educators of all types who manage groups of learners in their career development journey.

5

Continued growth & support

CareerVillage provides ongoing support throughout the partnership process. Our goal is to continue working together to not only improve the Coach experience but also to refine accompanying resources and tools.
